Instructions for Installation and Care of Arctic Cat / Textron Prowler Pro Soft Top Cap AC-PRO-TC01

Notice: Do not smoke inside the cab or expose the enclosure to direct flames. Cab is Flammable.

Be sure to read these instructions thoroughly before opening and installing the top cap. The installation is best done when the temperature is 70 degrees F. or warmer. The temperature affects the adhesive Velcro, if conditions prevent installing in warmer weather it helps to store the adhesive Velcro at room temperature prior to installation.

1. Check over the parts included in the carton with the parts list shown below:

2" Adhesive Velcro Strip	3 each	6" long
30" Webbing Strap w/ Velcro	2 each	
30" Webbing Strap w/ Loop	2 each	

If any parts are damaged or missing please contact customer service at (800) 213-7981.

2. Begin by cleaning the roll cage and plastic that surrounds the doors. Using rubbing alcohol is preferable. This step is very important for the Velcro strips to properly adhere.
3. Begin installation of the Top Cap by placing the webbing straps on the vehicle. The front straps will use the two straps with double-sided Velcro sewn to one end. Wrap the supplied adhesive Velcro strip around the roll cage a little under halfway up the front bar. Then wrap the double-sided Velcro on the end of the strap around this tightly so the strap point upward.

4. In the rear of the vehicle take the two straps with loops sewn on one end and wrap them around the frame just above the frame bolts. There is a space here just under the cross frame that the strap will fit. Take the loop end and run it through first from the inside of the cab and then run the other end of the strap through the loop as shown in the photo below.

5. Now place the Top Cap over the frame so that the pointed side faces the front of the vehicle. Make sure that it is properly centered and run the straps through the buckles and pull it down tight. The straps should look like the photos below.

Thank you for your purchase!
